

RESPONSIBLE LAND ADMINISTRATION: GEOINFORMATION AND MORE

Prof.mr.dr.ir. Jaap Zevenbergen
Professor Land Administration and Management
Head of Department PGM
Editor in Chief Land Use Policy

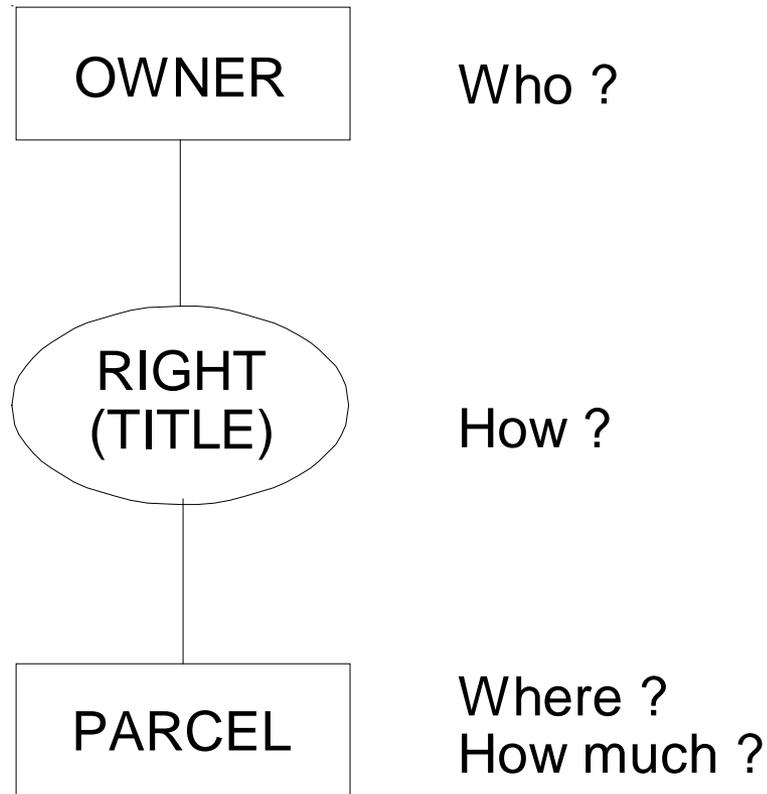

LAND ADMINISTRATION

- People-to-land relationships

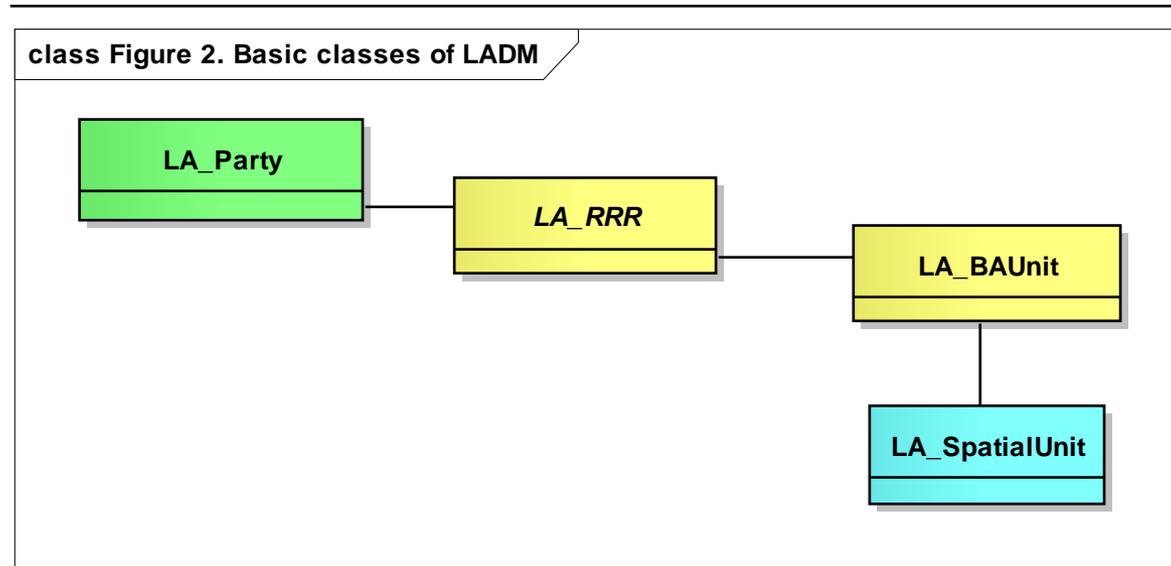

LAND ADMINISTRATION

- We need to **determine** the who, the how and the where !

LAND ADMINISTRATION DOMAIN MODEL

- ISO 19152 (2012; currently being updated)
 - 4 main entities, Spatial Unit is 1 of the 4
- RRR = Rights, restrictions and responsibilities
 - People-to-people-to-land relationships
- Spatial Unit asks for technology

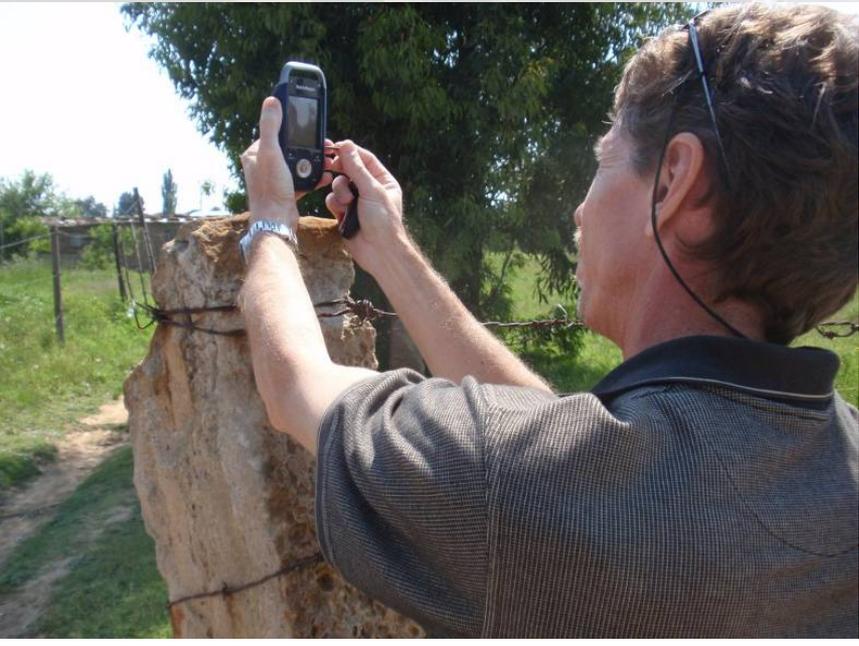

USE OF TECHNOLOGY

- capturing the parcels and their dimensions
 - use of technology from early on
 - e.g. Plane Table →

ANALOGUE DISTANCE MEASUREMENT (RDS) NETHERLANDS, 1985

GNSS for ground control and parcel surveys

USE OF HIGH-RESOLUTION SATELLITE IMAGERY

USE OF UAV TO COLLECT (LOCAL) IMAGERY

- Early work in Namibia

 **drone4land** @drone4land · Jan 30
Great achievement: in collaboration with @Charis_FlyinCam, the @its4land1 project, @INESRUHENGRI and @esrirwanda conducted their first successful fixed-wing drone flight at Gahanga Cricket Stadium. Big thanks to all authorities making it possible! #Rwanda

(SEMI) AUTOMATIC FEATURE EXTRACTION

- To automate Feature Extraction for UAV-based Cadastral Mapping
- H2020: Crommelinck et al 2019 – PhD defense in October

REMEMBER:

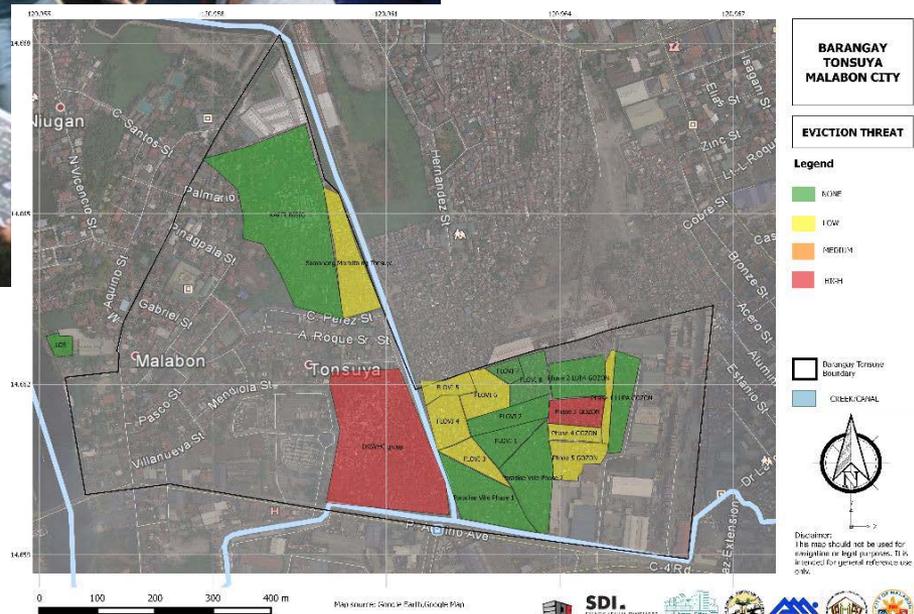

- **PEOPLE**-to-land relations
- It is about the people
- For the people
- And with the people
 - Participatory Processes

Fit-for-Purpose Land Administration – the concept

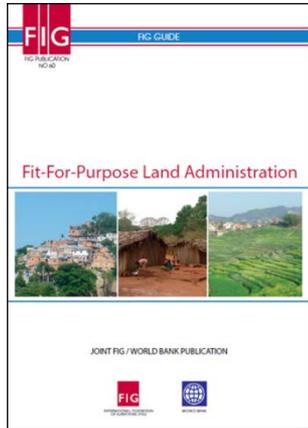

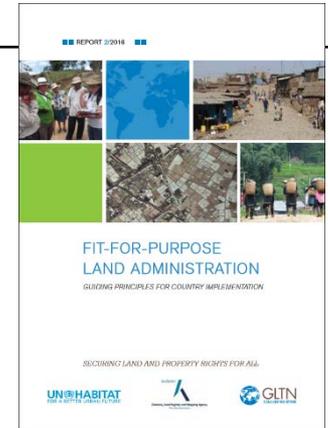

FIG pub. no. 60
2014

Spatial Framework

GLTN Guide
2016

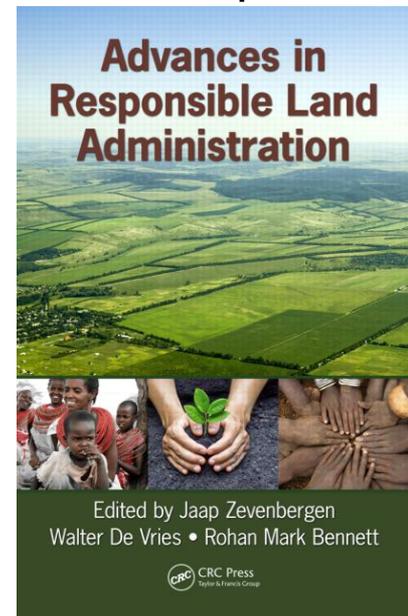

**Fit-For-Purpose
Land Administration**

Legal Framework

Institutional Framework

'SMART LAND MANAGEMENT'

- Smart land management refers to the various kinds of land governance, land policy, and administration processes
- “that use social **technologies**, volunteered geographic information, and crowd sourcing in combination with technical drivers of intelligent information systems and big, linked, and open data”
- **to drive solutions for land-related challenges**
- (Zevenbergen, de Vries and Bennett, 2016: p.274).

CHANGE AGENTS

- Innovative land administration can be done
 - technologically enough is already available
 - it needs esp. change of mindset
 - interdisciplinary and cross agency thinking
 - goal and client orientation, not technocratic procedures, requirements and ‘mandates’
 - appropriate (post) graduate training in new ideas, but especially in **attitudes** of land professionals, which include (parts of):
 - land surveyors, lawyers, planners, valuers / real-estate economists, IT-specialists, ..
 - land professionals should “Be Part of the Solution, Not the Problem!” (FIG president in 2012)
